🔗 Lee's Dotfile Customizations

These are my myriad [dotfiles](#). It has grown, morphed, shifted and developed since I discovered the [Thoughtbot dotfiles project](#) and based this off of that. Hats off to the Thoughtbot folks for making basing my stuff off of theirs so easy! 😊

🔗 Installation

1. Install [strap](#)
2. Create a symlink for the `packages` directory so Atom stylesheet stuff works correctly

```
$ ln -s ~/.atom/packages ~/.dotfiles/atom/packages
```

🔗 License

[MIT](#)
